

# Skill-building for cloud and app protection

▶ Cloud, AI platform, and app protection

Learn to secure cloud infrastructure,  
AI platforms, and modern apps

Start your training journey

New to Microsoft Security? Begin with these foundational topics.

Courses may be taken in any order

## Describe the concepts of cybersecurity

Learn about cybersecurity concepts and ways to protect yourself and your business from cyberattacks.

L 1 day

## SC-900: Introduction to Microsoft Security, Compliance, and Identity

Learn about compliance solutions in Microsoft technologies. Explore the Microsoft Purview compliance portal, information protection and governance in Microsoft 365, Insider Risk, audit, and eDiscovery solutions.

L 1 day

## Govern and protect sensitive information in the age of AI

Learn skills in securing and governing data within AI-driven environments, using Microsoft Purview to navigate AI risks and to help ensure compliance.

L 1 day

## Get started with identities and access using Microsoft Entra

Demonstrate core skills in managing identities and access with Microsoft Entra. You'll configure users, groups, authentication methods, and conditional access in a real-world, interactive assessment.

L 1 day

Core security training

Ready to go further? Strengthen your skills with intermediate courses and credentials.

## AZ-500: Microsoft Azure Security Technologies

Learn to implement security controls, maintain organizational security posture, and address vulnerabilities across identity, platform, data, and operations.
